SUMMARY

Passionate about logic building. Working in web development enjoying different flavors of Technologies. Journey to get into product based company. Experience in Research and high level documentation under how Technology pace is moving. I would love to work in Research and development area.

SKILLS & COMPETENCIES

- MongoDB
- Angular 9
- React.js
- Express.js
- Webservices- REST
- JSEncrypt, OmniSciDB
- Open Source Libraries
- React-spring
- Angular-animation
- Material UI
- Axios, Rxjs
- Redux, Thunk
- Superset
- Spring Hibernate Basics

TRAININGS AND CERTIFICATIONS

- TCS-iON Certification
Career Edge - Knockdown the Lockdown
credential ID - 5-7031732-1016
- National level NPTEL Online Certification
IIT Kharagpur, Mumbai
Scored 80% in 'C++', 65% in 'OperatingSystem'
73% in 'DBMS', 50% in 'Python'

OTHER TECHNOLOGIES

- IOT, Big Data & Hadoop, Ethical Hacking attended Workshop in IIT Bombay, IISC Bangalore
- React+Redux, HTML, JavaScript, Python, PHP, Java, SQL, Devops (Completed courses in Solo Learn)

Recognition

- Commendable Performer
- Winner in Women Hackathon at DC level Hyd

EDUCATION

Walchand institute of technology, Solapur – 2019

BACHELOR OF ENGINEERING- Computer Science

Government Polytechnic, Solapur – 2016

High School Diploma

PROFESSIONAL EXPERIENCE

Specialist System Engineer

Infosys- 1st July 2019 to present

Selected through HackWithInfy-2018. Trained and working in MEAN/ MERN stack. I am part of specialist team which is responsible for fast paced development and delivery of client critical applications.

Worked in under high level findings for Technology Trends, Future is AI, Open source for innovation.

Contributed in Hyderabad DC Technical events.

PROJECT DETAILS

- Hoopla shopping site – Developed SPA(single page application) in MERN stack following Agile scrum. Designed mongo DB database and used microservice architecture to achieve scalability. Used Redux along with react for intuitive UX and material theme for designing UI
- Docker-ization -Docker Containers to Build a Micro-Services Architecture with CI/CD Pipe-lining. The website in Django provides login/logout with various flavors of operating systems. user select/edit/delete OS and save within allocated space based on access control mechanism using port forwarding
- Smart-Sakhi (Android app) -under Ministry of Women and child development of government to maximize utilization of Government Services. Role:Database Administrator and Coder-PHP

PROFESSIONAL SKILLS

- Good Communication Skills with Understanding & Analyzing capability
- Leadership qualities, Solution Oriented, Positive approach
- Always ready to help, solution oriented
- Sharing Knowledge, Believe in Team work
- Design Thinking, Strategic Thinking
- Quick learner, Coder

INTERESTS

Singing, Dancing, Travelling, Social work, Reading Motivational Books & watching web series
